Is now in the market to produce chemical rain to order, rain to fall in 72 hours from the time we commence to operate, on the following terms: At \$500 per inch in a county. If four counties or more will contract together we will give a special discount from those terms. If we fail to produce one inch in the specified time, no pay. If one-half inch is produced, one-half price, and all over one-half inch shall be counted at the inch price. If over one-inch is desired it will be at the rate of \$200 per inch if taken at the same experiment. We will place four rain gauges 10 miles each way from where we operate, the aggregate of which divided by four shall be the quantity. The district shall be a radius of 100 miles each way from Wichita. In this district we think we can generally produce a rainfall in 36 hours. Outside of this district prices will be given on application.

## BLEW THEM UP

### AWFUL FIENDISHNESS OF COLORADO'S STRIKING MINERS.

A Hundred Pounds of Giant Powder Dropped Into a Mine and Exploded Among Workmen.

Eleven Non-Union Men, Imprisoned Like Rats in a Trap, are Blown to Atoms at Cripple Creek, Colorado.

Brutal Vindictiveness of Striking Miners Against Men Who Want to Work—Reign of Terror inaugurated by a Mob Who are Heavily Armed and Threaten to Fire the Town—Desperate Fighting is Expected.

**CRIPPLE CREEK, Colo., May 25.**—Eleven men killed, with a strong probability that the number of dead will be increased when all is known, is the record of the day of trouble here, and though fighting has not yet begun, as the deputies are awaiting reinforcements before beginning active operations.

At 10 o'clock this morning eleven men started work in the Strong mine on Battle mountain. Shortly afterwards a large party of strikers blew up the shaft house with powder, causing a loss of \$25,000, and then dropped 100 pounds of giant powder down the shaft which was also exploded, killing all the inmates. Not more than 300 yards from the Strong shaft house, sixteen men who had been engaged to go to work in the Independence mine were surrounded in their bunk house and after a long parley agreed to surrender. Each one was armed with a rifle and a brace of revolvers the arms now being in the possession of the strikers.

It is rumored that the strikers attacked the Anna Lee mine, overpowering the guards, after which they blew the shaft house, but the rumor has not been verified. When the deputies are finally massed and the two forces come together,

A DESPERATE BATTLE will doubtless be fought. The situation at 6 o'clock tonight is one of most painful anxiety. Not a few believe the town will be a smoldering mass by another sunset if the strikers be not restrained.

At Victor, six miles away, where fully 1,000 people reside, a reign of terror exists. Within a half mile of the corporation limits of the town, all day long fully 300 union miners, armed with rifles, have paraded up and down the side of the hill. Occasionally a detour into the village would be made and people whom the miners thought to be objectionable were ordered to leave the place. The guards from Denver upon arrival at Victor went into camp on a neighboring hill. The strikers threw out a picket line entirely surrounding them, but at a distance that guarantees them safety from the deputies' rifles.

PREPARED FOR DESPERATE WORK. It is said the strikers have planted, under their breastworks on Bull hill, a quantity of dynamite with the intention of blowing it up if it should be taken and occupied by the deputies.

During the early morning hours everything seemed quiet at Victor, but men were grave with apprehension. At 9 o'clock a rifle shot, followed by a fusillade, attracted attention to Bull hill, and the whole side of the mountain was seen to be covered with miners running towards the Strong mine. The tracklayers at work on the Florence and Cripple Creek road dropped their tools and took to their heels. People could be seen fleeing in every direction. With a shout a dozen men ran all through the Strong shaft and ore houses, and found and deep were the crevices when nobody was found. Two miners were then seen to emerge from the Independence powder house, each carrying a fifty-pound box of giant powder toward the shaft house. A fuse was stretched a distance of fifty feet and ignited. There was a painful silence lasting probably four minutes, then the shaft house was seen to raise a bright red light surrounding it. A deafening report and thousands of pieces of lumber and chunks of iron fell in every direction.

A TRIUMPHANT YELL from the miners signified their satisfaction. A hurried consultation was held, then two more boxes of powder were quickly produced, a fuse was stretched and the explosive was lowered into the shaft. Another painful silence, a trembling of the earth, a cloud of dust and pieces of debris hurried a hundred feet in the air, a deep, muffled roar and the work of death was done. The small ore house and waste lumber of the shaft house was fired and reduced to ashes.

It is lucky indeed that the 135 deputies from abroad, reinforced by 75 or 100 who had gathered and joined them, made no move against Bull mountain today. They would have been wiped from the face of the earth.

At least 600 miners, armed to the teeth and backed by a courage almost insuperable, stood ready to fight to the death. One of the largest mine owners in Colorado Springs is authority for the statement that the mine owners have planted a rifle cannon on a hill commanding the breastworks, and that it will be used to dislodge the strikers from that position. All sorts of rumors concerning the dealings at the Strong mine are afloat. All telephone connections have been broken, and it is feared the telegraph wires will go next. The deputies from Denver have been withdrawn to a less exposed position where they will await reinforcements. The strikers, from their stronghold on Bull hill, can view the country for miles and all passes are guarded by them. Every stranger is interrogated and not allowed to proceed towards the town unless a satisfactory explanation of his business is given. No one is permitted near enough to the seat of war to be in danger, and the streets of Cripple Creek and Victor, as well as the passes, are patrolled by miners carrying Winchester and revolvers. The capture and burning of deputies' boarding places was accomplished by women, and ever since the occurrence two of the women have been holding high court in a women's where the strikers keep guard and stand upon them. Two wagons loaded with powder and cartridges for use of the mine were captured by the strikers and their contents confiscated.

tured by the strikers and their contents confiscated. Sam McDonald, superintendent of the Strong, Anna Lee and Gold King mines, and Charley Robinson, foreman of the Strong, are missing. It is raining furiously and any further move tonight is not looked for. Deputies have been coming in quietly all day and it is thought an unexpected move is anticipated.

It is stated on good authority that Governor Waite is in sympathy with the strikers and that he will tomorrow issue a proclamation against the depredations and call out the militia to attack and disarm them.

**READY FOR THE FRAY.**  
Citizens of Pana, Ill., Organized, Armed and Will Resist Rioters.

**PANA, Ill., May 25.**—The people here are in a wild state of excitement over the reported approach of foreign strikers who are on the way to force out the men here and do damage to the mining plants. Late telegrams from Illinois Central trainmen say 2,000 men are enroute to Pana from southern districts, also that 1,000 are coming here from northern districts. All day citizens were being sworn in and the working miners who so desired were made deputies and armed. With those citizens who were sworn in at last night's mass meeting and at the monster meeting held at the city hall this evening, there is now a total of about 1,500 deputies armed and on duty. The strikers are drilling this evening and are in readiness to be in line at a moment's notice. The guard is composed of the best citizens of the town. The meeting this evening was a most enthusiastic one, every deputy declaring himself ready for service. Everything is in readiness for the strikers' arrival and the reception given them will be a warm one.

**GOVERNOR ALTOELD'S ORDER.**  
Troops Not to Guard Private Property, but to Keep Order.

**SPRINGFIELD, Ill., May 25.**—Governor Altgeld late this evening issued the following general order:

It is not the business of the soldiers to act as custodians or guards of private property. The law authorizes them simply to assist the civil authorities in preserving peace, quelling riots and executing the laws. Where troops have been or may hereafter be ordered out and an owner of property feels it necessary to have it guarded, he must do so at his own expense, and in such a case the troops can only be used for the purpose of promptly quelling a disturbance of the peace or suppressing a riot, or in some other way enforcing the law.

**UNEASINESS AT OTTAWA.**  
OTTAWA, Ill., May 25.—The trouble at La Salle and the threats of a mob to force this city to release the three cowards who were jailed here, have caused much uneasiness. Every preparation is being made to guard against their advent. The sheriff at La Salle telegraphed here tonight that if the prisoners were released and brought to Peru, the miners would make more trouble. States Attorney Duncan replied that the riding could not run this county. According to the latest reports, the miners of La Salle, Oglesby and Spring Valley are preparing to march to Ottawa and liberate the miners by force. The city authorities have made ample preparations and the whole town is prepared for a skirmish.

**WORST PART OVER.**  
PITTSBURGH, Kan., May 25.—The Weir Coal company are entertaining the idea of reopening shaft No. 2, at Kinkwood, which they had shut down a couple of weeks ago until September. Only two shafts in the district are idle now, and it is the general opinion that the worst part of the trouble is over.

## THIS CURIOUS THING
